MUHAMMAD IZZUDDIN BIN MOHD FATHI

izzuddinfathi0@gmail.com • 016-9263679 • https://github.com/udini16 •
https://udini-portfolio.vercel.app/

SKILLS

Web & Frameworks: React, Laravel, Tailwind CSS, Node.js, RESTful APIs, Bootstrap, HTML/CSS, Django

Programming languages: PHP, JavaScript, CSS, HTML, Java, C++

Tools & Software: Git, GitHub, Docker, Vite, Composer, VSCode, Azure DevOps, Figma, SourceTree, Unreal Engine, Resend API, Nodemailer

AI & Machine Learning: Deep Learning, Computer Vision, YOLO, Large Language Models (LLMs), OpenAI API

Languages: Bahasa Melayu (Native), English (Fluent)

EDUCATION

UiTM Melaka, Campus Jasin **Expected Graduation: Sept 2026**

Bachelor of Computer Science, CGPA: 3.5
Relevant course work: Mobile Programming, Enterprise Programming, Image Processing, Artificial Intelligence Algorithms, Data Structure, Algorithm Analysis and Design, Software Engineering.

UiTM Pahang, Campus Raub **Graduated: Feb 2024**

Diploma in Computer Science, CGPA: 3.41
Relevant course work: Fundamentals of Data Structures, Java OOP, Web and Mobile Application, Programming Paradigms, Information System Development.

PROFESSIONAL EXPERIENCE

Aptronics Sdn Bhd, Petaling Jaya **Mac 2026 – July 2026**
Full Stack Developer Intern

- Engineered advanced simulation environments in Unreal Engine 5, utilizing robust C++ implementation to develop complex, interactive systems.
- Developed a custom runtime scenario editor, creating dynamic controls that allow users to configure physics parameters using precise numerical values instead of basic categorical presets.
- Optimized system performance and stability by strictly managing memory allocation and refining execution logic during the development of high-fidelity simulations.

Softoya Sdn Bhd, Telok Panglima Garang **Sep 2023 – Feb 2024**
Software Developer Intern

- Upskilled in Laravel and Alpine.js, applying these technologies to build responsive and interactive web components.
- Successfully integrated the Tesseract OCR API into a Laravel environment to develop a prototype for scanning and digitalizing financial receipts.
- Conducted a comprehensive market analysis of Low-Code/No-Code platforms, evaluating them based on functionality, pricing models, and UI/UX standards.

TECHNICAL PROJECTS

Urban Tree Species Identification (AI / Full-Stack) **Oct 2025 – Feb 2026**

- Final Year Project: Engineered a semi-real-time computer vision pipeline utilizing YOLOv10 and Python, successfully automating the identification of urban tree species from large-scale Google Street View datasets.

Modern Pokedex (Frontend Web App) **Early 2026**

- Built a highly responsive, single-page application utilizing React 18, Vite, and Tailwind CSS v4 to consume and display external RESTful API data.
- Implemented advanced state management and asynchronous data fetching techniques to ensure smooth, lightning-fast rendering of hundreds of data points.

Hermes JobPortal (AI / Full-Stack) **August 2026**

- Engineered a full-stack job application tracking platform utilizing React, Tailwind CSS, and Node.js, featuring an automated Puppeteer web scraper to aggregate listings across multiple regional job boards.
- Integrated OpenAI's LLM to dynamically generate highly tailored Markdown resumes and cover letters based on specific job descriptions and user profiles.
- Built an automated email outreach pipeline utilizing the Nodemailer via Gmail with built-in pixel tracking, integrated with a Telegram bot for real-time read receipts.

Racket Arena (Full-Stack SaaS) **Oct 2025 – Dec 2025**

- Engineered a conflict-free scheduling engine using Laravel and MySQL, implementing strict validation logic to prevent overlapping bookings across multiple resources.
- Developed secure role-based dashboards (RBAC) utilizing Tailwind CSS and Chart.js, enabling facility administrators to continuously track real-time revenue and optimize court utilization.
- Containerized the application using Docker and deployed the backend API and cloud database to Render for high availability.
- Automated resource allocation by integrating a mock FPX payment gateway to instantly assign courts upon transaction success.

CERTIFICATIONS

- Google UX Design Professional Certificate (2026)
- TOP CODERS - CODING CHALLENGE – Certificate of Participation (2025)
- Python Programming Fundamentals Level 1 & 2 (2025)
